

Kinerja Positif Semester I-2026: UCID Cetak Laba Periode Berjalan Rp158,62 Miliar dan Pendapatan Neto Tumbuh Menjadi Rp4,44 Triliun

JAKARTA, Agustus 2026 – PT Uni-Charm Indonesia Tbk (Kode Saham BEI: UCID), produsen terkemuka produk perawatan bayi, pembalut wanita, perawatan kesehatan/popok dewasa, serta makanan dan *toiletries* hewan peliharaan, mengumumkan laporan keuangan konsolidasian untuk periode Semester I-2026. Perseroan berhasil mencatatkan pemulihan operasional dan kinerja keuangan yang solid sepanjang paruh pertama tahun 2026.

◆Pemulihan Kinerja Keuangan yang Solid

Selama semester I-2026, Perseroan membukukan pendapatan neto konsolidasian sebesar Rp4,44 triliun, tumbuh 4,1% dibandingkan Rp4,27 triliun pada periode yang sama tahun 2025. Kenaikan ini juga ditopang oleh pertumbuhan penjualan domestik yang mencapai Rp4,02 triliun dan penjualan ekspor Rp423,45 miliar.

Melalui efisiensi operasional yang optimal, Perseroan berhasil mencatatkan laba operasi sebesar Rp116,362 miliar, berbalik positif dari posisi rugi operasi sebesar Rp2,293 miliar pada semester I-2025.

Secara keseluruhan, UCID sukses mencatatkan pemulihan kinerja (*turnaround*) yang signifikan dengan membukukan laba periode berjalan sebesar Rp158,62 miliar pada semester I-2026, berbalik positif dari posisi rugi pada periode yang sama tahun sebelumnya sebesar Rp6,15 miliar.

Pemulihan fundamental ini turut mendapat respons positif dari pasar modal. Harga saham UCID menguat sekitar 11,8%, bergerak naik dari Rp372,00 per saham pada akhir Juni 2026 menjadi di atas Rp410,00 per saham pada awal Agustus 2026. Penguatan harga saham tersebut menunjukkan bahwa perbaikan kinerja fundamental Perseroan mendukung pemulihan profitabilitas Perseroan dan telah memperoleh respons positif dari pasar. Tren tersebut berpotensi meningkatkan kepercayaan investor terhadap keberlanjutan pemulihan kinerja Perseroan ke depan. Namun demikian, pergerakan

harga saham juga tetap dipengaruhi oleh kondisi pasar modal secara keseluruhan, sentimen sektor, serta faktor eksternal lainnya, sehingga perkembangan kinerja saham perlu terus dipantau sejalan dengan konsistensi pencapaian kinerja Perseroan pada periode berikutnya.

◆Strategi Penguatan Portofolio dan Distribusi

Menjelaskan pendorong utama kinerja positif Perseroan, **Presiden Direktur PT Uni-Charm Indonesia Tbk, Yasutaka Nishioka**, menyampaikan, "Capaian kinerja ini didorong oleh langkah strategis Perseroan dalam mengoptimalkan portofolio bisnis, utamanya melalui peningkatan kontribusi segmen *Feminine Care* (FC) yang berhasil mendorong rasio laba bruto. Pada saat yang sama, UCID memperkuat saluran distribusi ke jaringan *General Trade* (GT) serta meningkatkan eksposur produk. Pertumbuhan positif ini juga didukung oleh kinerja kuat di platform *e-commerce*, penataan ulang jaringan distribusi, serta pengelolaan arus kas dan perputaran piutang yang kian stabil."

◆Prospek Menuju Semester II-2026

Pada semester dua tahun 2026, UCID bertujuan untuk ekspansi berkelanjutan tanpa menghentikan momentum pertumbuhan. Menanggapi faktor lingkungan eksternal seperti kenaikan biaya material dan peningkatan biaya pengiriman karena situasi di Timur Tengah dan situasi ekonomi di Indonesia, secara fundamental mengubah fondasi manajemen dengan mempercepat kategori bisnis yang menguntungkan, melakukan investasi terfokus pada pertumbuhan saluran distribusi, dan berinovasi produk untuk memenuhi kebutuhan pasar.

"Kegiatan bisnis ini kami jalankan selaras dengan komitmen keberlanjutan '*Ethical Living for SDGs*' demi memberikan nilai tambah jangka panjang bagi masyarakat, lingkungan, dan seluruh pemangku kepentingan," tutup Yasutaka.

Strong First-Half Performance: UCID Reports Current-Period Profit of Rp158.62 Billion and Net Revenue Grows to Rp4.44 Trillion

JAKARTA, August 2026 – PT Uni-Charm Indonesia Tbk (IDX Ticker Code: UCID), a leading manufacturer of baby care, feminine care, healthcare / adult diaper products, as well as pet food and toiletries, announced its consolidated financial statements for the first half of 2026. The Company successfully recorded an operational recovery and solid financial performance throughout the first half of 2026.

◆Solid Financial Performance Recovery

During the first half of 2026, the Company recorded consolidated net revenue of Rp4.44 trillion, growing 4.1% compared to Rp4.27 trillion in the same period of 2025. This increase was also supported by growth in domestic sales, which reached Rp4.02 trillion, and export sales of Rp423.45 billion.

Through the optimal operational efficiency, the Company successfully recorded an operating profit of Rp116.362 billion, turning positive from an operating loss position of Rp2.293 billion in the first half of 2025.

Overall, UCID successfully recorded a significant performance recovery (turnaround) by posting profit for the period of Rp158.62 billion in the first half of 2026, turning positive from a loss position of Rp6.15 billion in the same period of the previous year.

This fundamental recovery was also met with a positive response from the capital market. UCID's share price strengthened by approximately 11.8%, moving up from Rp372.00 per share at the end of June 2026 to above Rp410.00 per share in early August 2026. This share price appreciation demonstrates that the improvement in the Company's fundamental performance supports the recovery of its profitability and has received a positive response from the market. This trend has the potential to increase investor confidence in the sustainability of the Company's performance recovery going forward. Nevertheless, share price movements continue to be influenced by overall

capital market conditions, sector sentiment, and other external factors, so stock performance developments need to be monitored continuously alongside the consistency of the Company's performance achievements in subsequent periods.

◆Portfolio and Distribution Strengthening Strategy

Explaining the main drivers behind the Company's positive performance, President Director of PT. Uni-Charm Indonesia Tbk, Yasutaka Nishioka, stated, "This performance achievement was driven by the Company's strategic steps in optimizing its business portfolio, primarily through increasing the contribution of the Feminine Care (FC) segment, which successfully pushed up the gross profit margin ratio. At the same time, UCID strengthened its distribution channels into the General Trade (GT) network and increased product exposure. This positive growth was also supported by strong performance on e-commerce platforms, the restructuring of the distribution network, as well as increasingly stable cash flow management and accounts receivable turnover."

◆Outlook Toward the Second Half of 2026

In the second half of 2026, UCID aims for sustainable expansion without breaking its growth momentum. Responding to external environmental factors such as rising material costs and increased shipping expenses due to the situation in the Middle East and the economic climate in Indonesia, the Company is fundamentally changing its management foundation by accelerating profitable business categories, making focused investments in distribution channel growth, and innovating products to meet market needs. "We carry out these business activities in alignment with our sustainability commitment 'Ethical Living for SDGs' to provide long-term added value for society, the environment, and all stakeholders," concluded Yasutaka.
